I am currently doing a Data Engineering learnership at the Umuzi Academy in Johannesburg. I choose to pursue Data Engineering as my career path because I have a passion for working with data infrastructure, solving technical challenges, and contributing to data-driven decision-making. The combination of technical expertise, continuous learning, and the potential for making a meaningful impact in various industries makes data engineering an exciting and fulfilling choice for me.

WORK EXPERIENCE

In-service Trainee P1/P2   Jun 2018 - May 2019

Element Six (Production) (PTY) (LTD), Springs

I worked as chemical engineering trainee towards a completion of Higher National Diploma in Chemical Engineering. I received a Certificate of Service which served as proof for completion of P1 and P2 practicals. I left because the contract ended.

Junior Data Engineer   Nov 2022 - Mar 2024

Umuzi Academy, Johannesburg

I am doing a Data engineering Learnership at Umuzi Academy, studying data infrastructure and pipelines. I have worked on the team that did psychometric analysis on the current applicant test items to see whether items successfully identify programming and statistics aptitude and people who can be placed. Decreased applicant screening time by 80%. Learned to use Agile, Git, OOP, Unit testing and Test-driven development.

EDUCATION AND QUALIFICATIONS

Higher National Diploma in Chemical Engineering   Jan 2015 - Dec 2017

Vaal University of Technology, Vereeniging/Vaal

Bachelor of Science in Computing   Mar 2021 - Present

University of South Africa, Pretoria/Sunnyside

National Certificate in Information Technology   Nov 2022 - Present

Umuzi Academy, Johannesburg
